

Conservation Tillage CONFERENCE

JANUARY 28 - 29, 2009
JACKPOT JUNCTION • MORTON, MN

The University of Minnesota Extension is proud to host the 5th Annual Conservation Tillage Conference. This 2-day conference is designed to help producers improve their conservation skills by refining their fertility management, learning about new technologies, and reducing production costs.

This year includes several of the leading industry and university conservation tillage researchers in the northern corn belt. In addition to the research based presentations, a panel of experienced conservation tillage farmers will provide management tips and answer questions. The conference will include a tradeshow which focuses on conservation tillage management.

We have applied for continuing education credits (CEU's) for certified crop advisors. The number of CEU's and categories will be available shortly before the conference.

For more information and to pre-register, please log onto:
